DETAILED ACTION

1. Formal Matters

- A. The Amendment filed 7/16/08 has been entered into the record.
- B. Claims 194, 196, 198, 200-206, 208, 210-214 and 216-238 are pending and are the subject of this Office Action.

2. Claim Objections

- A. All objections have been withdrawn in view of Applicants' cancellation of, or amendments to the claims.

3. Claim Rejections - 35 USC § 112, first paragraph – scope of enablement

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

- A. Claims 194, 196, 198, 200-206, 208, 210-214, 216-238 are rejected under 35 USC 112, first paragraph. Though Applicants have amended the claims to recite “95% sequence identity” and specific hybridization conditions, Applicants have removed the functional limitation “that responds to umami taste stimuli”. An explanation is requested. The Wands Factors analysis can be seen on pages 3-4 of the Office Action mailed 3/17/08.

4. Claim Rejections - 35 USC § 112, first paragraph – written description

- A. The rejection of claims 194, 196, 198, 200-206, 208, 210-214 and 216-238 under 35 USC 112, first paragraph, has been withdrawn in view of Applicants' amendments to the claims.

5. Claim Rejections - 35 USC § 112, second paragraph

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

- A. All rejections under 35 USC 112, second paragraph, have been withdrawn in view of Applicants' cancellation of, or amendments to the claims.

Art Unit: 1647

6. Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

A. The rejection of claims 194, 196, 198, 200-206, 208, 210-214 and 216-233 as being obvious over US Patents 7,301,009, 7,309,577, 7,303,886 has been withdrawn in view of the fact that a method of making protein by expressing its nucleic acid does not render obvious the protein, itself, or the method of using the protein.

B. Claims 194, 196, 198, 200-206, 208, 210-214 and 216-233 remain rejected and new claims 234-238 are also rejected as being obvious over 7,364,903. As mentioned on page 7 of the Office Action mailed 3/17/08, no restriction between the claimed method of making protein and the cell transfected with the nucleic acid was made in any parent application.

7. Conclusion

A. No claim is allowable.

Art Unit: 1647

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
